# WELCOME TO FENCEX 2018

The UK's only trade exhibition dedicated to perimeter protection, access control and fencing.

**'FENCEX HAS MUCH TO OFFER AND WE ARE ALREADY MAKING PLANS FOR THE 2020 EXHIBITION TO ENSURE THE SHOW IS VIBRANT, RELEVANT AND MEETING THE NEEDS OF BOTH EXHIBITORS AND TRADE VISITORS'**

There are 50 stands at Fencex representing almost all sectors of a rapidly growing industry.

Companies from the UK, Europe, India and the USA are here at Fencex 2018 which has a new look.

Once again the exhibition coincides with the DHF's Gate Safety Week initiative, aimed at heightening awareness of the issues involved.

One of the two seminars will again centre on gate safety while the Association of Fencing Industries will host the afternoon seminar, concentrating on FISS/CSCS cards.

Since it came back on to the industry calendar in 2000, Fencex has grown into both a showcase and a centrepiece for the industry.

As in other years, companies are

launching new products or services at the exhibition, using it as a platform to win new business.

While the subject of Brexit is never far from the news headlines, the industry has proved to be both resolute and impervious to situation, concentrating instead of being innovative and moving forward.

New investment and a buoyant market have again underpinned the industry as a whole. Just what lies ahead in the future no one knows and few are willing to forecast.

What is of concern though is that the industry does need to attract the workforce of tomorrow and it faces an imbalance of those leaving and those seeing it as a career. Companies need to heed the warnings of a skills shortage. It is something that needs to be addressed and addressed quickly.

Fencex has much to offer and we are already making plans for the 2020 exhibition to ensure the show is vibrant, relevant and meeting the needs of both exhibitors and trade visitors.

Thank you for coming to Fencex and we look forward to welcoming you back in 2020.

**Ian Law, Organiser of Fencex and Editor of Perimeter Systems Magazine.**

## TRIBUTES PAID TO FENCEX PARTNER

Simon Bishop, who has been part Fencex for 18 years ago, has died, aged 65.

He had played a key role in the evolution of Fencex since its inception in 2000.

He had been become involved in the fencing industry in the 1980s, but formed the partnership with Perimeter Systems editor Ian Law to relaunch Fencex in 2000.

'Fencex is not the same without Simon,' said Ian. 'He was a dear friend who helped to make things tick. He had not been well for a number of months, but in typical Simon style had not let his illness take away his smile or his determination. We miss him.'

Obtaining a masters degree in marketing, he was appointed marketing manager for supplier Goodman Croggon before it was acquired by the McArthur Group, whom he subsequently joined. He left, in the late 1990s to set up his own business outside of the fencing industry.

A memorial service was held in Bristol in August.

**FENCEX IS HELD EVERY TWO YEARS IN THE UK AND ORGANISED BY FENCEX, SHENSTONE, LICHFIELD, STAFFS WS14 0ND  
CONTACT DETAILS ARE: T: 01543 480322, E: INFO@FENCEX.COM, W: WWW.FENCEX.COM**

## SEMINARS

**11.30am  
Seminar Theatre**

### **GATE SAFETY WHERE WE ARE TODAY**

This will be led by Nick Perkins, the DHF's Training Officer and Stuart Roddy of EasyGates Direct

It will be followed by a Q&A session

**2pm  
Seminar Theatre**

### **LATEST UPDATE ON FISS/CSCS CARDS**

Ian Ripley, CEO of the Association of Fencing Industries will make the presentation supported by Stephanie Craig-Smith of Lantra

# Fully Engineered Hadley Fencing Solutions

Optimum Strength-To-Weight Ratio, Maximum Durability

## UltraFENCE

Using our unique cold roll forming expertise, UltraFENCE is the first complete cold rolled fencing system where every component has been specifically designed to optimise strength to weight ratio and is stronger yet more economical than traditional palisade systems.

## UltraBAR™

Suitable for commercial sites, housing schemes and recreational spaces, our UltraBAR™ system is the most versatile fencing solution available: offering high security thanks to its unique bolt head protection and anti-grab tags, as well as material strength.

## UltraSECURE

The first fencing system of its kind. UltraSECURE features unique steel slats fixed between each pale providing an extremely strong and secure perimeter. The system is available in two forms, solid for applications requiring total privacy or perforated where good surveillance of the premises is required.

Hadley Group is a global £130m turnover cold rollforming business, with production facilities in the UK, Netherlands, Turkey, UAE and Thailand. We combine design and production expertise to deliver standard and bespoke solutions to a wide range of industry sectors internationally. Our worldwide patented UltraSTEEL® process offers both cost and material savings in a variety of applications. We use it to engineer our own fencing solutions to meet your unique requirements.

SHAPING THE FUTURE IN METAL

Come and see us exhibiting  
at FENCEX, stand 2

**AA FENCING UK****STANDS 4 & 5**

Evans Road, Speke, Liverpool L24 9PB  
**T: 0151 486 9869, E: info@aaafencing.co.uk**  
**www.aaafencing.co.uk**

AA Fencing manufacture and supply all domestic and security fencing, specialising in mesh, railings and gates.

**AFI - ASSOCIATION OF FENCING INDUSTRIES****STAND 23**

19 Omega Business Village, Northallerton DL6 2NJ  
**T: 020 8253 4516, E: info@afiorg.uk**  
**www.afiorg.uk**

The AFI exists to promote professionalism, quality and safety throughout the UK fencing industry, as well as raising its profile and image. We provide members with business opportunities, industry news and technical information.

We also encourage inter-member trading and collaboration with a dedicated online trade portal.

All members have access to technical help from our in-house specialists and are represented at BSI, LANTRA, CSCS and Build UK. With free access to the certified contractor scheme and close links with specialist groups such as WPA, Gate safe and DHF, our members have an effective marketing tool that demonstrates they have passed the strict criteria for high standards of competency, quality and safety.

Our membership is growing constantly and our aim is to continue to bring our members together so that we can encourage and support the UK fencing industry.

We are looking forward to Fencex 2018. Why not join us for a coffee and a bacon sandwich from 9.30-10.30 at stand 23 to find out more about the benefits we offer and the work we do.

**A PERRY LTD****STAND 37**

Doulton Road, Cradley Heath, West Midlands B64 5QW  
**T: 01384 414001, F: 01384 411100, E: sales@perrytrade.co.uk**  
**www.perrytrade.co.uk**

Meet the team and see new products that include stainless steel, decking rope and 'Flexi-Fill' tubs and trugs!

Here at Perry® we continually strive to give our customers the best possible buying experience.

Along with our customer service and internal sales teams, we have a highly knowledgeable team of account managers who can deliver the attention your business demands.

By maintaining our position as a market leader and with over 90 years in business, we have established a popular range of products without compromising on quality or performance.

The Perry® brand offers guidance and support across our entire product range, with assistance merchandising our products to help maximise your sales.

**BARKERS FENCING****STANDS 25 & 26**

Duke Street, Fenton, Stoke-on-Trent ST4 3NS  
**T: 01782 319264, F: 01782 599724,**  
**E: sales@barkersfencing.com**  
**www.barkersfencing.com**

Barkers Fencing are the UK's largest steel fencing manufacturer, with a complete range of security, ornate and sports fencing and unrivalled UK manufacturing facilities to offer the best value and quality available.

As the only manufacturer with on-site manufacturing, galvanising and powder coating, Barkers control costs and offer the best possible service across the broadest product range.

Standard products are readily stocked at the most competitive possible prices and over 150 years of engineering and design capabilities allow any project to be tackled.

The high security sector is fully covered with a comprehensive range of CPNI and LPCG SR1 & SR2 fences and gates on offer.

Every year Barkers provide 100,000's of metres of fencing and gates to secure everything from schools and playgrounds to ports, industrial sites, railways, power stations and military bases.

The Barkers range includes – Palisade, VGuard 200\*50 Mesh, ProGuard Mesh, TwinGuard 868 and 656 Mesh, SecureGuard 358 Mesh, Bronze Twin 868 and 656 Ball Courts, Bronze Rebound 868 and 656 Ball Courts, Bow Top, Playsafe Bow Top, Vertical Bar, Tubular Railings, Forged Head Railings, Pedestrian Guardrail, LPCB SR1 and SR2 Fences, SR3 and SR4 Security Cages, StronGuard Maximum Security Palisade, Swing and Sliding Gates, Noise Barrier Posts.

**BARRIER COMPONENTS LTD****STAND 1**

Unit 8, Dolphin Point, Dolphin Way, Purfleet, Essex, RM19 1NR  
**T: 01708 891515, F: 01708 891516,**  
**E: sales@barrier-components.co.uk**  
**www.barrier-components.co.uk**

Barrier Components Ltd is exhibiting new systems produced by our manufacturing partners, Locinox and FAC.

We are showing a new lightweight aluminium cantilever system from FAC which offers robust yet quiet performance alongside of their now established tried-and-tested trackless bi-fold gate solution which can be operated both manually and by using standard automatic drive units, providing the ideal solution for installations in limited spaces.

Our Locinox presentation includes the new retrofit, fully adjustable Lion gate closer for gates up to 1100mm wide and 75kg in weight. This is offered with the refined Modulec surface mounted keeper, activated using the new Slimstone electronic keypad.

A selection of other new Locinox components are also available to view.

In addition, we are showing the latest Anvil high quality architectural hinge and latch solutions for both steel and timber.

# TRUGUARD

ROTATING ANTI-CLIMB SYSTEM

# MAKES PREMISES SECURE

EASY INSTALL  
EASY INSTALL  
EASY INSTALL

Classed as a non aggressive anti-climb system

Freely rotating anti-climb guard which creates an unstable barrier and rolls if an intruder attempts to climb over it

Suitable for use in locations where wall spikes, broken glass, barbed/razor wire and spiked rotating systems are illegal

Aggressive appearance, deters potential intruders and prevents any attempt to access your premises

Freely rotating system offers

Don't miss - the launch of our new automated gate, the latest fencing system innovations and the opportunity to find out more about our market leading 10-year installation and product guarantee.

- Stand 45-46 - talk to our gate experts and get up close and personal with the latest in gate technology. Our team will be on hand to answer any questions and demonstrate our new bi-folding speed gate.

- Stand 30 - pop by for a chat at the home of the BEKassure guarantee, product innovation and global solutions.

Betafence Group is the world's largest industry leading perimeter fencing manufacturer and supplier with over 135 years' experience. Globally the group has 8 production plants and currently distributes to over 100 countries.

Betafence Limited has built on this expertise and experience, delivering the highest quality and most reliable systems in the world.

We offer an extensive range of perimeter security solutions for a wide variety of applications based on your needs - with low, medium and high security solutions plus 'Secured by Design' options available. Systems are finished using one of the most sophisticated powder coating lines in Europe.

We look forward to meeting you.

**BIRKDALE****STAND 17**

Granville House, The Heights Business Park, Ibstone Road, Stokenchurch HP14 3BG

**T:** 07584 256 192, **F:** 0345 450 9085,**E:** sales@birkdalesales.com**www.birkdalesales.com****BIRKDALE**

Birkdale, the leading wholesale supplier of superior gate accessories and hardware are proud to present a new revolutionary addition to our FENCEMATE® range.

There are many well-known problems with traditional forms of fencing. Traditional wooden posts rot, crack and warp and, while concrete posts are strong, they lack flexibility, their weight and bulk makes them hard and slow to install and they make fences look less attractive.

But at last there's a solution.

The new FENCEMATE® DuraPost complements the beauty of wood with the strength of steel to create durable fencing that's quick to install.

Come and see new FENCEMATE® DuraPost; the Future of Fencing on stand 17.

**BLOK N MESH UK LTD****STANDS 11 & 36**

Hammond Road, Knowsley Industrial Park, Merseyside, L33 7UL

**T:** 0870 950 57 88, **E:** sales@bloknmesh.com**www.bloknmesh.com or www.polmilfence.com**

Established in 1990, Blok N Mesh is the UK's leading manufacturer of temporary fencing, site hoarding, barriers and compounds available for hire or sale nationwide via our network of 18 strategically located depots, and capable of producing over one million temporary fence panels per annum from our five acre facility in Merseyside.

We are exhibiting two 'On Ground' fence systems this year:

- The new DEFENDER™ - described as 'on ground paladin fencing' - for applications where high security fencing cannot be justified but traditional panel and block systems are considered inadequate. Referred to as an 'intermediate' fence by The National Grid - it has been tested and approved for protecting temporary work areas at both gas and electricity substations.

- CPNI assessed POLMIL® - originally designed for, and 25km supplied to, the London 2012 Olympic Games' venues, this Queen's Award winning range of re-locatable security fencing is now deployed at sensitive Government sites, nuclear facilities, airports, national infrastructure locations and temporary places of potential protest or confrontation.

Both the above have been approved, and are being used, to protect the enabling works for HS2 Phase 1 (London to Birmingham).

We hope you will visit and judge for yourself.

**BORG LOCKS****STAND 40**

9 Upminster Trading Park, Warley Street, Upminster, Essex RM14 3PJ

**T:** 01708 225 700, **F:** 01708 226338, **E:** sales@borglocks.com**www.borglocks.com**

Brand new and on display for the first time is our new 'mini' gate lock series which has the option of 140mm or 110mm fixing centres.

These combined with our ECP 'on gate' code change and our new push/pull pad function that makes this new series ideal for smaller metal gate applications.

We are also featuring several new models for timber gate applications, specifically back-to-back models, incorporating our new 20mm security latch.

**COVA SECURITY GATES LTD****STAND 21**

C1 Sussex Manor Business Park, Crawley,

West Sussex RH10 9NH

**T:** 01293 553 888, **E:** cova@covasecuritygates.com**www.covasecuritygates.com**

Cova Security Gates design, manufacture and install high quality bi-folding gates, sliding cantilevered gates, shallow and full depth road blockers, static and rising bollards, barriers, pedestrian gates and turnstiles. Our products are designed and manufactured bespoke to the clients site conditions and their specific requirements.

Cova products are rated for continuous operation and designed for applications that demand reliability in high vehicular throughput locations. We offer a full turnkey project service, from initial consultancy, 3D CAD design, UK factory production and manufacturing - right through to installation and commissioning.

Our perimeter security products are critical for protecting high profile sites such as government buildings including HMRC, local authority buildings, embassies, airports, financial services, public access areas such as stadiums, education, transport, emergency services, retail and commercial sites and residential property.

Cova were the first manufacturer in the world to bring a PAS 68 crash tested trackless bi-folding gate to the market place and have a comprehensive PAS 68:2010 HVM (hostile vehicle mitigation) compliant crash rated product portfolio, designed to counter vehicle borne attacks to critical national infrastructure.

We work alongside metal and mesh fencing manufactures on projects globally where there is a need to provide a joint perimeter protection solution.

**DETECTION TECHNOLOGIES LTD****STAND 33**

Unit A, Fairview Buildings, Heage Road Industrial Estate, Ripley, Derbyshire DE5 3GH

**T:** 01773 744750, **E:** info@ detection-technologies.com  
**www.detection-technologies.com**

Detection Technologies is a UK company specialising in the design and manufacture of electronic perimeter intrusion detection systems and can draw upon more than 60 man-years of practical experience in this highly specialised field.

This impressive total has been accumulated as a result of designing, installing, and commissioning such equipment on a broad spectrum of sites whose security relies heavily on the effectiveness of their perimeter intrusion detection systems.

Detection Technologies core sensor product is the VibraTek advanced linear magnetic sensor cable which has been specifically designed to provide high performance intruder detection capability when deployed on fences or other barriers used to define the perimeter of any secure site.

VibraTek is a true 3rd generation sensor embodying unique design features which ensure excellent detection capabilities allied with an enviably low false alarm rate, particularly when deployed on rigid fence constructions where the performance difference between VibraTek 3G and less sophisticated sensors is immediately obvious.

A wide range signal analysers are available employing the latest digital signal processing technology to ensure that the needs of every site, regardless of size or shape, can be met cost effectively and without compromising performance.

**DHF****STAND 47**

Shuttington Farm Fields, Main Road, Shuttington, Tamworth B79 0HA

**T:** 01827 52337, **E:** patricia@dhfonline.org.uk  
**www.dhfonline.org.uk**

DHF (Door & Hardware Federation) is widely regarded as the leading independent voice of authority in the areas it represents - locks and building hardware, doorsets, industrial doors and shutters, domestic garage doors and automated gates - DHF is revered as the 'go to' body for technical knowledge, information, advice, and practical help, with a network of professional staff members as well as external consultants.

DHF continues to grow from strength to strength and offers a comprehensive training programme for automated gates, industrial and garage doors, as well as four courses related to fire doors in conjunction with BRE.

There is a natural synergy with the fencing industry who are increasingly being asked to install, service or maintain automated gates. DHF has produced a Code of Practice that can help explain what standards are required to keep a gate in a compliant and safe condition DHF TS 011:2018, copies of which will be made available on the day. Come and find out more on stand 47.

**DURALOCK PERFORMANCE FENCING****STANDS 13 & 14**

6A Enstone Business Park, Enstone, Chipping Norton, Oxon OX7 4NP

**T:** 01608 678238, **E:** sales@duralock.com  
**www.duralock.com**

Manufacturers of safe, maintenance free PVCu fencing systems for a wide range of applications including sports facilities, schools, commercial, hospitality and many more.

The product of exhaustive trials, Duralock fencing offers UV-stabilised PVCu formulations of the highest quality reducing the risk of shattering. It is strong and durable, yet flexible in the event of a collision.

Smooth, rounded surfaces plus the fencing's ability to flex significantly reduce the risk of injury on impact. The fencing provides strength combined with flexibility, is safe for the public and is comfortable to lean against, with added impact modifiers and UV inhibitors to protect the PVCu from the sun, it will not discolour, and so is maintenance-free.

Competitively priced Duralock fencing is the perfect choice for any fencing requirement.

**EAGLE AUTOMATION SYSTEMS****STAND 29**

Unit 5, New House Farm, Vicarage Lane, North Weald, Essex CM16 6AP

**T:** 01992 524 800, **E:** sales@eagleautogate.co.uk  
**www.eagleautogate.co.uk**

Eagle Automation Systems Ltd style, source and supply high security PAS68 and IWA-14 gates, bollards and barriers.

Eagle was established in 1988 and is one of the leading gate automation and security companies in the south of England. Eagle manufactures a complete range of bi-folding speed gates, swing gates in steel and wood, sliding gates, tracked and cantilevered, and a full range of PAS 68-IWA-14 gates, bollards and street furniture.

**EASYGATES DIRECT****STAND 12**

Unit 16, James Scott Road, Halesowen B63 2QT

**E:** info@easygatesdirect.co.uk

**www.easygatesdirect.co.uk**

EasyGates Direct is a nationwide electric gate and garage door automation, access control and safety supplier.

With over 25 years experience in the industry, we stock 1,000s of products. Our 35 strong team of dedicated staff offer pre and post support over the telephone, email and live chat. Experts in radio systems and specialist remote controls, we are also ASO Safety Solutions competence partners.

**ELIZA TINSLEY****STAND 31**

Potters Lane, Wednesbury, West Midlands WS10 0AT

**T:** 0121 502 0055, **F:** 0121 502 7352, **E:** sales@elizatinsley.co.uk  
**www.elizatinsley.co.uk**

With over 160 years of history, today Eliza Tinsley are a leading supplier of agricultural, ironmongery, fencing hardware, fixings and chain and rope.

Established in 1851, the company have built a strong reputation for supplying quality products with a first class service.

Visit us where we will be showcasing a selection from our vast product range, including our 'Swiftpost' fence supports and showing our new range of tools.

With our head office still in the 'Black Country' and a 89,000 sq ft distribution warehouse in Brighouse, Eliza Tinsley can meet the demands of the modern customer.

**EURO FENCE COATINGS****STAND 15**

Forge Lane, Dewsbury, West Yorkshire WF12 9BU

**T:** 01924 468846, **F:** 01924 468478,

**E:** info@eurofencecoatings.com

**www.eurofencecoatings.com**

Euro Fence Coatings Ltd is an approved applicator of Akzo Nobel and all power coating is covered by Akzo Nobel 25-year architectural warranty. EFC's coating spec conforms to BS EN 13438: 2005.

Zinc phosphating is universally used as a pretreatment process for steel and all motor cars worldwide prior to the finishing process. This pre-treatment, coupled with powder application in the region of 75 to 100 microns, provides a tough smooth resilient finish.

For Marine Grade Level environment, EFC recommends using Thermo Plastic Powder. This PVC coating provides the best solution for rough and tough environment without having to resort to regular cleaning or using primer as a base coat. Even contact with sea water will not diminish its performance. This coating system normally provides 200-plus microns thickness in a single coat.

EFC submits panels for regular testing and is achieving 1000 hours salt spray tests. It is always difficult to correlate salt spray resistance to life-cycle, but as a rough guide indicates 20-years plus exterior exposure.

**ExMesh SECURITY PRODUCTS STANDS 38 & 39**

Longhill Industrial Estate, Hartlepool TS25 1PR

T: 01429 867388, E: sales@exmesh.co.uk

[www.exmeshsecurity.co.uk](http://www.exmeshsecurity.co.uk)

[www.expandedmetalcompany.co.uk](http://www.expandedmetalcompany.co.uk)

The Expanded Metal Company is a leader and innovator in the development and manufacture of expanded metal mesh products. It combines more than a century of industrial experience with cutting edge technical capabilities and advanced production processes.

Manufactured by The Expanded Metal Company, the ExMesh™ security range features certified fencing and physical barriers which can be applied to a wide range of internal and external environments.

The range includes fencing and gates (with high security LPS 1175 SR2 and SR3 certified options available), Securilath™ (a security lath designed for installation between walls, ceilings and roofs), anti-climb measures and cages. The range also features Paliclad, a cost effective upgrade to existing palisade fencing, and Fastrack, a fencing solution developed in conjunction with the rail industry.

Operating from a 25,000 sqm site in Hartlepool, North East England, The Expanded Metal Company works closely with contractors and end users to create bespoke solutions for their projects, drawing on our wide-ranging design and manufacturing expertise, and high class production capabilities.

The Expanded Metal Company was the first UK fencing manufacturer to be awarded 'Secured by Design' status and was formerly part of the Expamet group of companies.

**FaCT - FENCING AND CONSTRUCTION TRAINING STAND 27**

85 Bunbury Road, Northfield, Birmingham B31 2ET

T: 0121 476 4731, E: info@fctrain.co.uk

[www.fctrain.co.uk](http://www.fctrain.co.uk)

FaCT (Fencing and Construction Training) are the UK's largest provider of training to the fencing industry. The company provides all sorts of training courses such as : health and safety; vocational (abrasive wheels, power tools, CAT and Genny etc); formal qualifications (level 1 to level 5) and card renewals. It also has access to government funding that can be used to reduce the cost of training.

FaCT are industry experts when it comes to compliance and training regulations, and are always on hand to provide information and advice.

FaCT understand the importance of young people in securing the future and growth of an ageing industry. The funded apprenticeship scheme is one way that they are encouraging businesses to not only employ young people, but equip them with the skills essential to the future of the industry.

Having worked in the industry for so long, FaCT understand the time constraints and financial impact on training. Therefore, they work with their clients to produce a schedule and training plan to suit their needs. An experienced close-knit organisation, FaCT pride themselves on a personalised service and close relationship with their clients.

**FIRST FENCE LTD STANDS 6, 7 & 8**

Kiln Way, Swadlincote, South Derbyshire DE11 8EA

T: 01283 512 111, E: sales@firstfence.co.uk

[www.firstfence.co.uk](http://www.firstfence.co.uk)

First Fence was established in 2010 and has fast become one of the front-runners of today's UK fencing industry. We manufacture and supply a wide range of security and temporary fencing, as well as traffic management and access solutions.

Serving clients on a national and now international scale, we cater to a variety of commercial and industrial markets, as well as public sectors.

Alongside our Midlands headquarters, we also operate depots across the UK, located around Birmingham, Bradford, Bristol, London and Glasgow.

With an impressive logistics fleet and 'can-do' attitude, we go one step further than meeting the expectations of our customers – we exceed them. By recognising and understanding the key requirements of speed and availability, we have been able to specially tailor our services to ensure that our customers return to us time and time again.

Utilising a broad range of digital systems to ensure smooth daily running, contributing towards easy and trusting relationships between ourselves and our clients so throughout our time working together, we both know exactly where we stand.

Whether you are hiring or buying from us, we guarantee that you will receive products of the highest quality, with an unbeatable service to match.

**www.security.gallagher.com**

Gallagher is a global technology company that develops and delivers intuitive, intelligent and innovative protection solutions that integrate seamlessly with customer's business management systems.

Gallagher offers comprehensive security solutions for organisations, addressing the key issues of risk management, personnel workflow and business continuity. Our security solutions are in use with national and local government, mining, military, commercial, industrial, healthcare, transportation and academic organisations in more than 100 countries.

Gallagher's Command Centre software delivers one platform to centrally configure and manage access, intruder alarms and perimeter security. It provides extraordinary value by integrating security technology with core critical business operations. The system automatically executes organisational policy and workforce management by enforcing regulatory and business compliance. The business-connected platform resides on an organisation's IT network and stores information about cardholders, the site and system activity, to deliver total site security. It uses the most secure encryption technology available to support multiple zones within a single site and numerous facilities.

Gallagher's security solutions include software controlled and standalone perimeter security electric fencing, no-feel sensor technologies and integrations with third party technologies.

Visit [security.gallagher.com](http://security.gallagher.com) for more information.

**www.hadleygroup.com**

Hadley Group is a world leader in advanced cold rolled steel technology, with manufacturing facilities in Europe, the Middle East and Southeast Asia, and more than 600 employees worldwide.

We deliver innovative solutions with applications across sectors as diverse as construction, automotive, industrial and agriculture. At the heart of this is UltraSTEEL®, a patented cold rolling process that enables the production of components with up to 20% more strength and a similar reduction in raw materials. Our heritage extends back for over 50 years and has been built on the skills of our workforce, ongoing investment in innovative and productive technologies, and the long term relationships that we maintain with customers around the world. We have shaped our business around adding value for our customers; understanding their diverse needs and, through local expertise, market insight and manufacturing capabilities, delivering beyond expectation. Our cold rolled steel fencing solutions provide an optimum strength-to-weight ratio, ensuring maximum durability, easier handling and fast installation.

Our ranges include:

- UltraFence – the only cold rolled engineered palisade fencing system
- UltraSecure – steel palisade fencing with infill
- UltraBar™ – versatile system featuring our patented raking joint
- UltraFixings – a full range of fixings, including tamper-proof products
- UltraGates – gates of all sizes.

**HERAS****STAND 9**

Heron's Way, Doncaster DN4 8WA  
**T:** 01302 354551, **E:** info@heras.co.uk  
**www.heras.co.uk**

Starting in 1952 as a small family-owned company specialising in fencing, Heras, a CRH company, has grown into an end-to-end supplier of perimeter protection solutions. We operate in over 12 countries and employ more than 1,100 highly skilled experts. Our purpose is to keep people, premises and items safe and secure. We do that by providing perimeter protection solutions across business, community and industry sectors. We are experts in perimeter protection.

At FenceX 2018, Heras is demonstrating a wide range of products that represent our diversity in perimeter

Protection - featuring within our stand is our latest addition to entrance control - the sGate, a bi-folding gate containing a patented mechanism. Also on show is our latest addition to demarcation - Zenith, featuring the SR3 which specialises in protecting high security sites. In addition to Zenith and the sGate, our cutting edge noise reduction barrier with very effective noise insulation and absorption will feature.

**IAE FENCING****STAND 20**

**T:** 01782 339320, **F:** 01782 339323, **E:** fencingsales@iae.co.uk  
**www.iae.co.uk**

Established since 1969, IAE is one of the country's largest fencing manufacturers and suppliers of steel railings and mesh systems. Competitive prices and the UK's largest stocks allow IAE to service the needs of today's market.

As well as standard fencing systems, IAE regularly work with architects and specifiers, drawing on years of experience to assist with a wide range of special fencing projects.

To ensure we continually meet the needs of our customers, new products and lines are always being added. In recent years, site protection equipment such as column protectors, wheel guides and internal mesh edge protection systems have joined cycle and smoking shelters in being added to our range.

**www.mordea.com**

MRT Fencing – has more than 50 years of experience working with the industry.

Moreda Riviere Trefilerías is the leading manufacturer of galvanized wire and fences in Spain and a prime reference in Europe. MRT

offers a diverse range of added value products such as: panels, posts, railings, gates, hinged joint fence, fix knot fence, barbed wire, welded mesh, chain link fence, staples and nails...

Having more than 150 years of experience, MRT uses the most developed production techniques and is committed to the continuous improvements that take place on the international market.

MRT is part of the Celsa Group, which has a production capacity of 9 million tons per year and has subsidiary companies in six countries.

The Celsa Group maintains control of the scrap that is melted into wire rod and then drawn into the wire used in the production process. Thanks to this vertical integration, MRT is able to guarantee the highest quality of their products. This, combined with the fact that we own 2 PVC coating lines, allows us to offer a warranty of 10 years.

We look forward to welcoming you in our stand in FenceX 2018.

Zedlock is pleased to offer technical advice to installers and after-sales assistance should it be required. Distributed directly by Zedlock and available from a growing number of stockists, including the Fence Shop.

# SEMINARS

## AUTOMATED GATE SAFETY - EXPLAINING THE CODE OF PRACTICE

**Presented by Stuart Roddy of EasyGates Direct and Nick Perkins, senior training officer with DHF**  
**11.30am Seminar Theatre**

**Stuart Roddy** of EasyGates Direct played a lead role in 2012 in assisting with the publication of the first guide to highlight automated gate safety legislation and standards.

A member of the DHF automated gate group since it was first formed, he is acknowledged as one of the UK's leading experts on automated gate safety.

**Nick Perkins** is senior training officer with the DHF and has been at the forefront of delivering gate safety training since it was introduced some five years ago.

He too is an expert in this field and continues to work closely with bodies such as HSE and other legislative organisations.

Together the two will be addressing common installer questions regarding TS011 and any grey area within the current standards/codes of practice.

What is the DHF?

What is the TS011:2018 code of practice?

How does it help gate installers comply?

Why should I use it?

Common questions.

This will be followed by a Q&A session.

## FENCING INDUSTRY SKILLS SCHEME - WHAT IS IT AND WHY DO WE NEED IT?

**Presented by Ian Ripley, CEO of the AFI and Stephanie Craig-Smith, Market Development Manager, Lantra**  
**2pm Seminar Theatre**

**Ian Ripley** was appointed chief executive officer to the Association of Fencing Industries this year

He has more than 40 years experience in the fencing industry, having headed up the Tinsley Wire fencing operations in Sheffield before moving to Fairmile Fencing. He set up his own consultancy business and has been a member of the BSI standards committee predominantly dealing with the updating of BS1722 specifications.

Since taking office he has been instrumental in completing market research which shows the industry as a whole, is worth more than £1 billion and provides employment for more than 60,000.

**Stephanie Craig-Smith** has been with Lantra since 2010 and has latterly specialised in the highways, construction and plant sector.

She works closely with industry to support changes and new developments, ensuring the sector continues to comply with current legislation and industry best practice and, where appropriate, developing improved standards both in the UK and abroad.

At just 143mm tall, the BL3080 Mini from Borg Locks is designed with smaller profiles in mind, where full sized units are simply too large.

With a push paddle built into the unit and specially coated with our own MG Pro finish, this unit is sure to last in the most difficult environments. Built with the same high quality Borg Locks engineering as the BL3100 but simply scaled down, the BL3080 is sure to impress no matter how small it may look.
