WELCOME BACK... FENCEX 2021 RECONNECTING OUR INDUSTRY

Once again we are pleased to welcome you to Fencex which this year celebrates its 20th anniversary. While the pandemic is far from behind us there is plenty to look forward to as the UK perimeter protection, access control and fencing industries come together for the first time in over 18 months.

The sectors have again proved themselves to be resilient in the face of adversity and many manufacturers, suppliers and contractors showed true innovation to continue working in unprecedented circumstances.

Alongside of this, it has had to deal with the consequences of Brexit, but, yet again, the industry has proved to be both resolute and impervious to the situation, concentrating, rightly, on the future rather than the past.

Today a number of companies will be taking the wraps off their latest products and services. DHF, which is celebrating the 10th anniversary of the formation of the Automated Gate Group, will be staging an informative question and answer seminar and the Association of Fencing Industries will fully launch two key initiatives – Apprenticeships and AFI Industry Awards.

Much has happened since Fencex came back on to the industry calendar, but

one thing that has not is the need to attract more into the industries. It has been a concern with the need to address the imbalance of those leaving and those seeing it as a career. Skills shortages cannot, and should not, be overlooked and solutions must be found if the industries are to progress.

Over two decades, Fencex has grown into both a showcase and a centrepiece for the industry and it is evident from industry feedback that there is great energy for this year's exhibition. People are the lifeblood and they want to be back together face-to-face.

Having said that as organisers we have done everything possible to make this a safe show and your co-operation is paramount in ensuring we meet all expectations, respecting those who still may not feel comfortable in the post Covid surroundings.

There could not be a better time for Fencex... to all our exhibitors, venue staff, exhibition staff and visitors we say 'thank you' and we hope enjoy the show.

Ian Law, Organiser of Fencex and Editor of Perimeter Systems Magazine.

BORG LOCKS STAND 4

Unit 9 Upminster Trading Park, Warley Street, Upminster, Essex RM14 3PJ
01708 225700
sales@borglocks.com
www.borglocks.com

Borg Locks are delighted to be showcasing their range of mechanical push button access controls for steel, aluminium and timber gates. All models come with the latest Easicode Pro (ECP) function allowing quick – on the gate/door code change. Exhibiting the all new: BL7000 ECP Marine Grade Pro series - the heaviest duty lock for the harshest of external/marine applications. Available with a variety of locking devices to suit steel, aluminium or timber gates/doors.

BL4409 ECP Marine Grade Pro Series – Redesigned surface latch element, with a larger and easier to use knob turn. With the addition of a dual action sliding button on the back edge of the case enables the hold open feature when engaged in one direction or allows dead latching in the other, denying keypad operation from the outside.

BL3000 ECP 'Mini' Marine Grade Pro Series – Latest addition to the metal gate lock range with an optional 140mm or 122mm fixing centres. Combined with the ECP 'on gate' code change and new push/pull pad function that makes this range ideal for smaller metal gate applications.

BL2625 ECP Marine Grade Pro Series - the ultimate, compact-sized, rim-fixed sliding deadbolt with the added unique feature of keypad operation from both sides.

DHF STANDS 32 & 33

The Barn, Shuttington Fields Farm, Main Road,

01827 52337
info@dhfonline.org.uk
www.dhfonline.org.uk

DHF (Door & Hardware Federation) is proud to sponsor FenceX for 2021 and celebrate ten years of supporting the automated gate and traffic

barrier industries. Acclaimed as the leading independent voice of authority in the areas it represents, DHF is revered as the 'go to' body for safety and legislation training, technical knowledge, information, advice and practical help. DHF maintains a strong network of professional staff members and external consultants. DHF continues to grow from strength to strength, providing a comprehensive training programme for the automated gate industry by offering accredited courses for automated gates and traffic barriers as well as industrial and garage doors. The Level 2 Safety and Level 4 legislation awards provide the learner with formal theory qualifications that complement the NVQ, but doesn't replace it. Both the Level 2 and Level 4 awards are also available with ABBE accreditation, DHF also produces several technical specifications that explain the detailed requirements for those in the industries in which its members operate, including the highly regarded TS 011:2019 Code of Practice for Powered Gates & Barriers. Copies of this publication and many others will be available on stands 32 & 33.

DURALOCK PERFORMANCE FENCING STANDS 5 & 6

6a Enstone Business Park, Enstone, Chipping Norton, Oxon OX7 4NP
01608 678238
sales@duralock.com
www.duralock.com

Manufacturers of safe, maintenance free PVCu fencing systems for a wide range of applications including sports facilities, schools, commercial, hospitality and many more.

The product of exhaustive trials, Duralock fencing offers UV-stabilised PVCu formulations of the highest quality reducing the risk of shattering. It is strong and durable, yet flexible in the event of a collision.

Smooth, rounded surfaces plus the fencing's ability to flex significantly reduce the risk of injury on impact. The fencing provides strength combined with flexibility, is safe for the public and is comfortable to lean against, with added impact modifiers and UV inhibitors to protect the PVCu from the sun, it will not discolour, and so is maintenance-free.

Competitively priced Duralock fencing is the perfect choice for any fencing requirement.

EASYGATES DIRECT STANDS 13 & 35

Unit 16, James Scott Road, Halesowen,
West Midlands B63 2QT
01384 569 942

ENGINEERED COMPOSITES LTD STAND 36

Unit B4, Borders 2 Ind. Park, River Lane,
Saltney, Chester CH4 8RJ
01244 676000
info@engineered-composites.co.uk
www.engineered-composites.co.uk

Engineered Composites Ltd is located on the English Welsh border in Chester and we specialize in Glass Reinforced Plastic (GRP) components. The

company has been celebrating 30 years in existence this year. GRP palisade and mesh fencing components have become very popular with the power and rail industries as GRP is non-conductive and radar transparent. GRP has a very high strength to weight ratio and it is a quarter of the weight of steel. We have large stocks of GRP fencing components in both grey and green for quick turnarounds. We can also provide components for GRP single and double gates. We also supply GRP profiles in 6m lengths, such as U channels, I beams, tubes and box sections. GRP is also used for other applications such as handrails and barriers, flooring and rebar as an alternative to steel. We deliver all over the UK and have even supplied GRP palisade fencing to Africa.

EURO FENCE COATINGS LTD STAND 16

Forge Lane, Dewsbury, West Yorkshire
WF12 9BU
01924 468846
info@eurofencecoatings.com
www.eurofencecoatings.com

Euro Fence Coatings Ltd is an approved applicator of Akzo Nobel and all powder coating is covered by Akzo Nobel 25-year architectural warranty. EFC's

coating spec conforms to BS EN 13438: 2005.

Zinc phosphating is universally used as a pre-treatment process for steel and all motor cars worldwide prior to the finishing process. This pre-treatment, coupled with powder application in the region of 75 to 100 microns, provides a tough smooth resilient finish.

For marine grade level environments, EFC recommends using Thermo Plastic Powder. This PVC coating provides the best solution for rough and tough environments without having to resort to regular cleaning or using primer as a base coat. Even contact with sea water will not diminish its performance. This coating system normally provides 200-plus microns thickness in a single coat.

EFC submits panels for regular testing and is achieving 1000 hours salt spray tests. It is always difficult to correlate salt spray resistance to life-cycle, but as a rough guide indicates 20-years plus exterior exposure.

FaCT – FENCING AND CONSTRUCTION TRAINING STAND 29

85 Bunbury Road, Northfield, Birmingham
B31 2ET
0121 476 4731
infor@fctrain.co.uk

Fastline are proud to offer a unique service in the perimeter security market.

We have continuously improved our processes and our products; this has helped us grown organically into the UK's leading manufacturer of steel perimeter systems. Specialising in standard steel palisade, mesh systems, bespoke-ornate solutions, sliding gate sets and our own range of LPS1175 security rated products. We intend to maintain our position as the UK's Number 1.

EXHIBITOR LIST AND HALL PLAN

FIRST FENCE STAND 8

Kiln Way, Swadlincote DE11 8EA
01283 512111
sales@firstfence.co.uk
www.firstfence.co.uk

First Fence was established in 2010. Since then, the company has gone from strength to strength, quickly becoming one of the fencing industry's front

runners in the UK. With this huge success, a headquarters was established in the South Derbyshire town of Swadlincote. This allowed for a greater manufacturing facility with larger office space. Alongside the new head office, regional fencing centres were set up in Dartford, Bristol, Tipton and Glasgow. In 2021, the Dartford depot was replaced with one in Essex. This new location offers better transport links and superb stock holding which has enabled further growth.

FRONTIER PITTS STAND 20

Crompton House, Crompton Way, Manor Royal Ind. Estate, Crawley RH10 9QZ

QAB SYSTEMS STAND 10

Quartermasters House, Garelochhead,
Helensburgh G84 0EH
01436 810 540
gary@qabsystems.com
www.qabsystems.com

QAB Systems is the invention of Chris Johnstone, MD of WCC Group. Chris invented the system out of a requirement for rated lifting equipment for the

installation of 358 high security mesh (prison mesh). The system has European and Australasian patents for use as a lifting accessory and personal anchorage. The brackets are ideal for connecting fall protection whilst working on security mesh fences and attached defences, as well as lifting the latest multi mesh fence panels. The range has expanded to include ladder access systems and brackets for temporary security toppings on moveable mesh systems commonly found at global conferences. The system is an accepted "Safe System of Work" on many MOD sites and is now commonly found on large construction projects where high security mesh is being installed or worked upon.

TRUGUARD STANDS 41 & 42

Perimeter House Trading Estate, Valepits Road,
Garretts Green, Birmingham B33 0TD
0121 789 86896
sales@truguard.co.uk
www.truguard.co.uk

Whether as a deterrent or for security, TruGuard helps to prevent unauthorised access to all kinds of property or premises susceptible to trespass, theft or vandalism.

TruGuard is manufactured by ABL Aluminium Components in Birmingham and is the UK's leading rotating anti-climb system. TruGuard will be on display on stands 41/42. Part of one of the largest metal groups in Europe, ABL is a customer focused business, backed by a legacy of manufacturing and technical support in all things non-ferrous.

TruGuard has been engineered to work with all perimeter security, walls, gates, palisade fencing, even lightweight mesh fencing. TruGuard delivers an anti-climb perimeter security with an unrivalled quick and easy installation which is virtually maintenance free.

Rotating spurs are mounted on a central 2m shaft, longer runs are made possible by the use of an interlocking flush-fit connector and the system includes a dedicated suite of mounting components.

TruGuard is offered as standard in bright mill-finish, however a powder coated colour range is available to order, in any RAL reference.

Examples of the product will be displayed on the stand where the TruGuard team look forward to discussing projects or technical challenges end-users may face.

Nick Perkins

Steve Hill

The panel will be livestreamed to the DHF Facebook page for those unable to attend in person. Hosting the panel will be **Martin Keelagher**, Chairman of the DHF Automated Gate Group. On hand to answer questions will be DHF Senior Training and Compliance Officers **Nick Perkins** and **Steve Hill**. Fencex attendees and those viewing the livestream are invited to pose their questions on gate and traffic barrier safety to the panel.
